

Challenge 04 - SASS & Flex

For this week's challenge, you'll need to create a gallery website full of images, using Flex & Sass. Refer to the screenshots & video folder to see the exact look of the page.

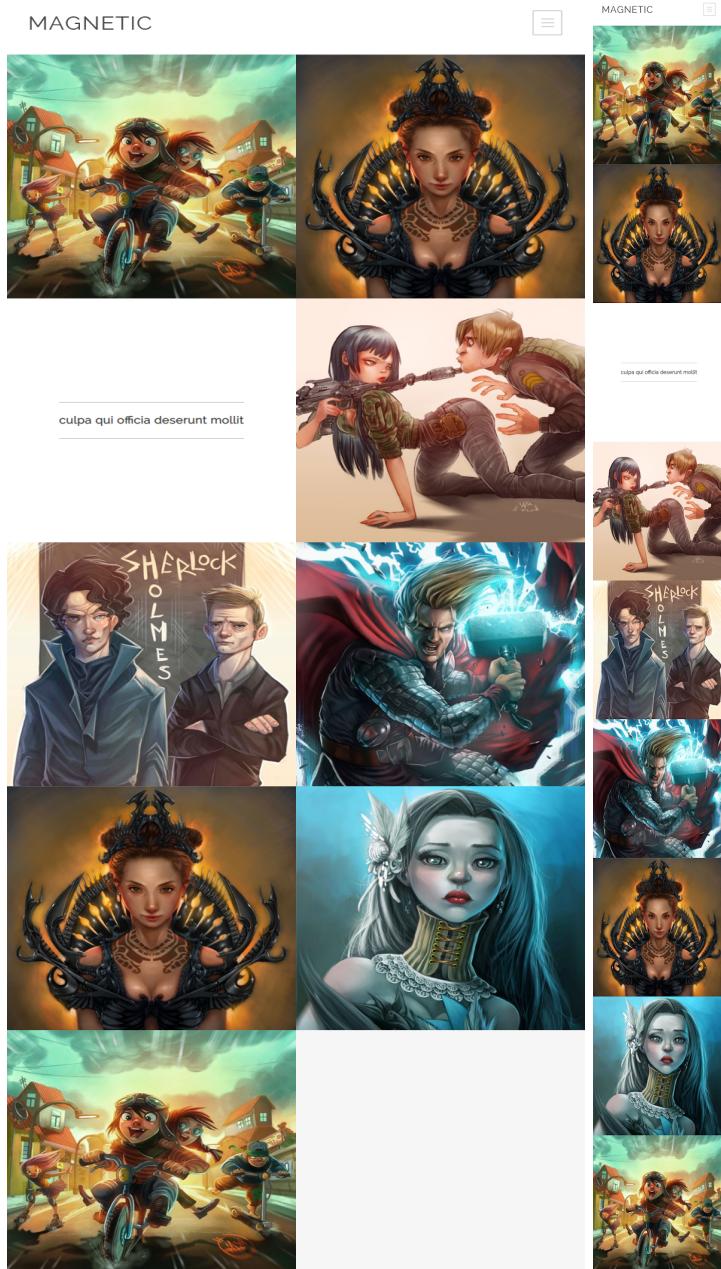

The menu on the left should be fixed. And every image is a link.

MAGNETIC

- [Home](#)
- [About](#)
- [The Team](#)
- [Journal](#)
- [Contact Us](#)

When the page is open in responsive mode (mobile and tablet), the sidebar menu should be switched to a hamburger menu.

Evaluation system:

1 point - Whole page completed in HTML & CSS

3 points - Add all the hover effects & make the page responsive for mobile and tablet devices.

5 points - for using SASS instead of plain CSS

Deadline:

1 week after its presentation, 23:59h end of the day.

Hints:

- Use Flex to avoid any pain in positioning the elements.
